

# OpenPrinting – Future Directions

OpenPrinting Japan Meeting 2007  
Tokyo, November 2

# OpenPrinting Workgroup Future Directions

## " **Short-term – Guidelines for printer testing/validation tools**

- Directory names, calling sequence
- Printer access only locally (USB, Parallel)?

# OpenPrinting Workgroup Future Directions

- " **Mid-term – Guidelines for print system testing/validation**
  - Cover various printing paths, renderers, channels, ...
  - Output into a file?

# OpenPrinting Workgroup Future Directions

## " Long-term – Enhancements for discovery/installation

- Driver installation URI extension for 1284 Device ID?
- See also previous PWG work on remote driver installation

# OpenPrinting Workgroup Future Directions

## " **Printing Dialogs - Query the Linux distributions**

- Is printing a vector of differentiation?
- If not, the OP should standardize printing dialogs/installation

# OpenPrinting Workgroup Future Directions

## " JTAPI - Model and API are overly complex?

- Simple data structures should be exposed to application?
- JTAPI could be extended with convenience calls
