

LF Research Sponsorship Prospectus

Benefits of Sponsoring Research

What is LF Research?

LF Research systematically investigates open source collaboration, communities, and industry dynamics to establish independent facts and reach new conclusions about the use and impact of open source in solving challenges around the world.

Explore areas of new systemic risks or opportunities

Identify best practices and how to leverage open source

Demystify the myths and misconceptions of open source value

Provide expertise and data-driven paths forward

What Makes LF Research Unique? “Open source first.”

The Linux Foundation is at **the center of 100,000+ open source leaders, engineers and end users**, working at some of the world’s most important companies.

Engaging our network of open source practitioners allows us to deliver primary research that creates:

A **richer, more complete understanding** of the uniqueness of open source development vs. product development

In-depth insight from our community’s expertise that hones in on the critical topics.

Actionable conclusions to inform decision makers.

Open data available for other analysts to incorporate into their work.

Positively Impact Your Project's or Organization's Reputation

2023 Linux Foundation Quantitative Insights

One of LF's biggest strengths is its strong research and data — where it outperforms both the tech sector and other associations

Research and Data: Does the organization contribute accurate, reliable research & data?

The Linux Foundation vs. tech company average and association average

How LF Research Drives Data-Driven Decision Making for Projects

- Determining the next course **OpenSSF** should build to provide the most value to their community.
- Understanding **CNCF** project penetration rates to tune project development strategies and influence investment.
- Exploring how to best invest in, grow, and position the **OpenSearch** product to support the needs of its community.
- Ensuring market relevance of a **Training & Certification** cybersecurity skills matrix
- Measuring and advocating for **a leading chip manufacturer's** open source involvement.
- Communicating the stark differences between **open and closed standards** and how organizations are pivoting to an open approach because of its ability to drive rapid innovation.

Validating the Open Source Value Proposition, Using Data

The Value of Open Source, Around the World

On a global average, **90%** of organizations surveyed **USE OPEN SOURCE AT A MODERATE, SIGNIFICANT, OR WIDESPREAD LEVEL.**

OSS USE

77% of organizations in Europe, 71% in the Americas, and 56% in Asia Pacific **BELIEVE THAT BENEFITS EXCEED THE COSTS OF OSS USE.**

OSS VALUE

A total of 68% of respondents believe that **OSS IS MORE SECURE THAN CLOSED SOURCE SOFTWARE.**

OSS SECURITY

OSS use brings many benefits, including **IMPROVED PRODUCTIVITY & SOFTWARE QUALITY, & A LOWER COST FOR SOFTWARE.**

OSS VALUE

The Value of Open Source Use / Consumption

The business value of using open source software (OSS) is well understood, and that value is increasing, according to 59% of respondents.

Open source is widely viewed to be vital to the future of industry sectors by 91% of survey respondents, 72% of which are outside of cross-industry IT vendors.

The most widely cited benefits of open source include improved productivity, innovation, and talent attraction.

57% of respondents from organisations of all types indicate that the value of open source has increased over the last year, suggesting accelerating momentum.

The Value of Open Source Technical Upskilling & Training

2024 STATE OF TECH TALENT REPORT

98% of organizations consider upskilling an important **strategy, with 36% rating it extremely important.**

2024 STATE OF TECH TALENT REPORT

Certifications rank higher than college or university degrees (23% to 16%) when assessing technical skills.

2024 STATE OF TECH TALENT REPORT

External hiring is both lengthy and risky: It takes on average **10 months to hire & onboard new technical hires**, and **nearly 40% experience turnover.**

2024 STATE OF TECH TALENT REPORT

Cloud (55%), DevOps (51%), Cybersecurity (49%), & AI/ML (43%) stand out as the key technology domains prioritized for staffing.

The Value of Courseware to Close Technical Talent Gaps

SECURE SOFTWARE DEVELOPMENT EDUCATION 2024 SURVEY

50% of professionals identify **a lack of training as a major challenge** for implementing secure software development, with this issue being particularly pronounced among data science roles (73%).

SECURE SOFTWARE DEVELOPMENT EDUCATION 2024 SURVEY

53% of professionals, especially those in system operations (72%), have not taken a course on secure software development, largely due to **the lack of awareness about good courses** (44%).

SECURE SOFTWARE DEVELOPMENT EDUCATION 2024 SURVEY

Python is highly favored for language-specific training, with 71% of respondents expressing a preference, although C and Java are selected more frequently when respondents rank their top choices.

SECURE SOFTWARE DEVELOPMENT EDUCATION 2024 SURVEY

To start mitigating the need for more secure software development education, the OpenSSF selected **Security Architecture as the topic of a new course**.

Industry Value of Open Source: Financial Services

OPEN SOURCE IN FINANCIAL SERVICES

90% of respondents agree that **open source** is valuable to the future of the *financial services industry*.

OPEN SOURCE IN FINANCIAL SERVICES

88% of respondents agree that **open source** is valuable to the future of *their organization*.

OPEN SOURCE IN FINANCIAL SERVICES

“Open sourcing internally developed projects” is the top factor for **increasing productivity at work**, with inner source close behind.

OPEN SOURCE IN FINANCIAL SERVICES

78% agree that their organizations are getting more value from open source compared to 2022.

How Research Benefits Different Stakeholders

Government: educating policymakers on the value and adoption of open source

Enterprise: capturing and communicating the business case for open source

Society: promoting technology projects for sustainable development

OPEN SOURCE IN EUROPE'S PUBLIC SECTOR

Outdated procurement processes, limited technical competences, and a lack of managerial buy-in are preventing the public sector from realising the full potential of OSS.

ECONOMIC VALUE OF OPEN SOURCE

The median respondents report that **the economic value of OSS is 1 to 2 times the cost** of its use.

LINUX FOUNDATION & THE SDGs

The LF manages a massive portfolio of digital public goods & provides the legal structures, funding sources, tools, growth mechanisms, & governance models for measuring community health that make sustainable development possible.

Research Deliverables are High-Value Marketing Collateral

Open sourcing internally developed projects is the top factor for increasing productivity at work, with inner source close behind. How is open source boosting your productivity? Let us know in the 2024 survey.

Recognizing Research Engagement: Credly Badges

Contributor badges are issued to individuals in the open source community who have supported the research development process, as:

- Author / co-author / ghostwriter
- Foreword author
- Survey author
- In-kind contributor
- Data analyst

Localization Partner badges are issued to individuals who have assisted in the localization of surveys and reports.

Badges appear on LFX [individual dashboards](#) to illustrate engagement.

How to Collaborate

Commissioning a Study: Questions to Consider

Objective setting:

- What is the goal of the research?
- Who is the target audience for the research?
- What is the hypothesis to be tested, or headlines desired from research?
- When is the research to be launched and published?

Methodology & logistical considerations:

- Survey, qualitative, dataset analysis, or a combination?
- Access to stakeholders & subject matter experts
- Budget & timelines

How Survey-Based Research Prices Scale

The following table shows how LF Research prices track based on common volumes of questions, completes, and insights.

Changes to # question, # completes, #insights all offer opportunities to reduce price.

Vendor	# Questions	# Completes	# Insights	\$ Questions	\$ Completes	\$ Charts	\$ Insights	Total \$* Based on LF completes
LF Research	15	200	15	\$10,125	\$2,800 - \$5,600	\$2,000	\$10,125	\$25,050 - \$27,850
LF Research	20	200	20	\$13,500	\$2,800 - \$5,600	\$3,000	\$15,188	\$34,488 - \$37,288
LF Research	30	300	30	\$20,250	\$4,200 - \$8,400	\$4,000	\$20,250	\$48,700 - \$52,900
LF Research	40	400	45	\$27,000	\$5,600 - \$11,200	\$6,000	\$30,375	\$68,975 - \$74,575
LF Research	50	500	60	\$33,750	\$7,000 - \$14,000	\$8,000	\$40,500	\$89,250 - \$96,250

*Minimum total costs assumes 50% completes from LF community.

Does not include travel should presentation at events be requested.

How Qualitative Research Prices Scale

The following table shows how LF Research prices track based on number of interviewees, word count, and localization requirements.

Changes to # of SME interviews, # of words, #languages all offer opportunities to reduce or increase price.

Vendor	# SME Interviews	Word Count	Second language localization	Total \$* Based on 1 localization
LF Research	4 to 6	1,500 to 3,000	\$2,000	\$25,000 - \$30,000
LF Research	6 to 8	3,000 to 7,500	\$2,500	\$30,000 - 35,000
LF Research	8 to 12	7,500 to 10,000	\$3,000	\$35,000 - \$75,000
LF Research	12 to 20	10,000 to 15,000	\$3,500	\$75,000 - \$95,000
LF Research	20 to 30	15,000 words and up	\$5,000 and up	\$95,000 +

*Minimum total costs assumes introductions to interviewees by project community.

Does not include travel should presentation at events be requested.
